Part III DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2-20-2003 has been entered.

2. Claims 17-19 are pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 17-19 are rejected under 35 U.S.C. § 102(b) as being anticipated by Alles et al., of record, as evidenced by ATCC catalog number 30-2002.

On page 3485, 1st full paragraph, the Alles et al., reference teaches expressing the full length human PTX3 protein in COS cells and incubated in DMEM and then isolating the protein in the supernatant for Western analyses. At the point the protein was isolated in the supernatant that had DMEM in it, the claims drawn to a pharmaceutical composition were anticipated. As evidenced by the ATCC Catalog No. 30-2002, Dulbecco's Modified Eagle's Medium, Modified Formulation, is useful as an in vivo solution, thereby meeting the pharmaceutical composition limitation. Lastly, Applicant is notified with regards to claims 18-19, a composition is a composition regardless of its intended use.

The prior art teachings anticipate the claimed invention.
